

# KCB Online Banking Enrollment

## Requested Services

User authorization level options include view-only access and full access. View-only access allows a user to view accounts but has NO authority to request services. Full access provides a user with full rights, permission to transfer between accounts, and to sign up for bill payment. Cash Management Services is a web-based tool that allows you the convenience of conducting your business from your office or home. Using this tool enables you to set up ACH originations for customer billing or employee payroll.

## Check all that Apply

- View-only Access
- Full Access
- Cash Management

There is no fee for KCB online banking and online bill pay. Both services are free. Fees do apply to cash management accounts.

If you have primary or joint ownership on more than one bank account, you can view all your current account balances while online and pay bills from any checking account.

## Customer Information

- New User
- Existing User Modification

Signatures: By signing below, I agree to the terms and agreements for online banking/bill payment services and electronic funds availability. I understand KCB will issue a login I.D. and a temporary password on my behalf, which I will be required to change to a private password the first time I log into the online banking system.

Signature of authorized user:
